Level 2 DFD

The Level 2 DFD below decomposes the four major sub-systems of the Hospital Patient–Doctor Management System into individual processes, data stores, and data flows. It covers: **Appointment Management (1.0)**, **Patient Record Management (2.0)**, **Medical Record Storage (3.0)**, and **Doctor Review & Suggestion (4.0)**.

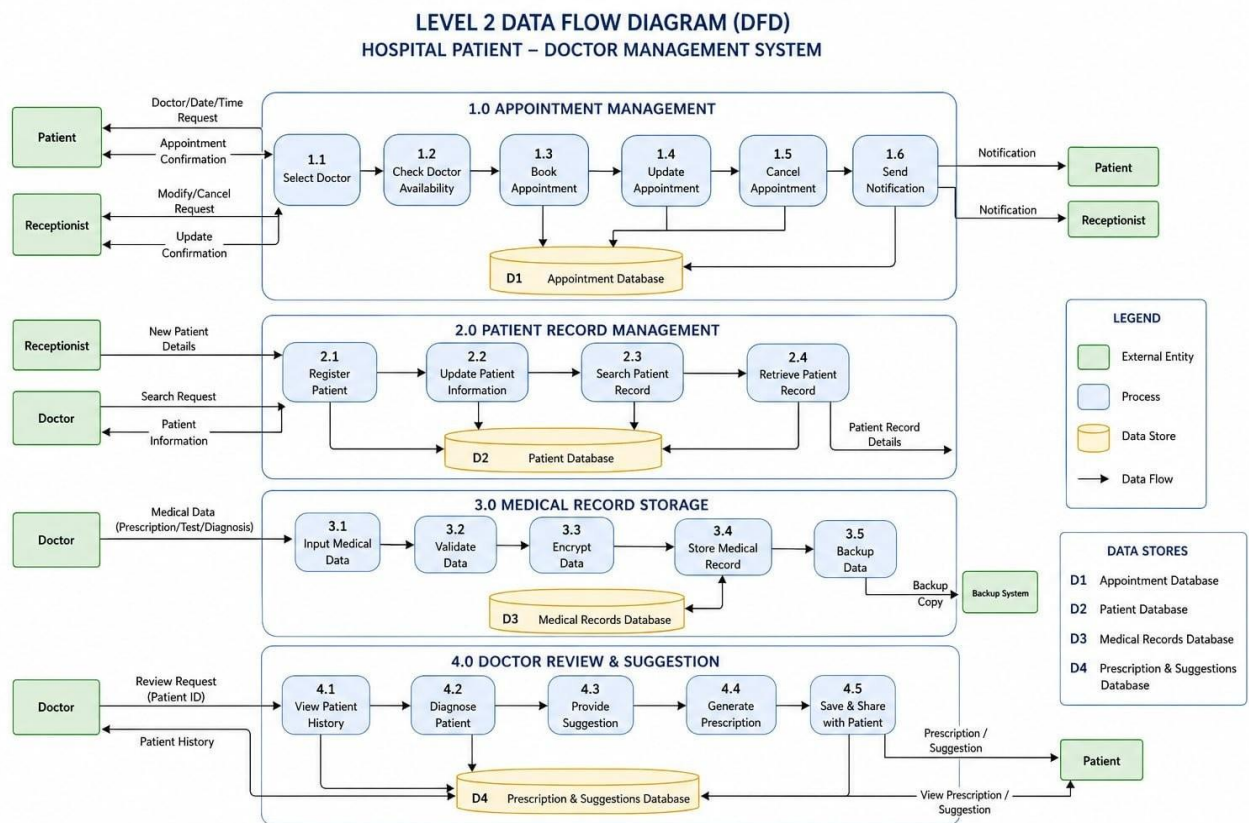

Figure 1 – Level 2 DFD: Hospital Patient–Doctor Management System

Database Schema

The Entity-Relationship diagram below maps the relational database structure derived from the DFD data stores and SRS functional requirements. Key entities include **patient**, **doctor**, **receptionist**, **administrator**, **appointment**, **health_record**, **medical_history**, **prescription**, and **doctor_suggestion**.
